Title: Creating Arrays

Aim:

To create 1-D, 2-D and 3-D NumPy arrays and display their shape, size, dimension and data type.

Algorithm:

1. Start.
2. Import the NumPy library (`import numpy as np`).
3. Create 1-D, 2-D and 3-D arrays using `np.array()`.
4. Display each array's `shape`, `ndim`, `size` and `dtype`.
5. Stop.

Program:
